

AIR Taxes

Airport taxes, always up to date.
Zero manual work.

Connect your pricing directly to the official data source and eliminate manual airport-tax update processes — for good.

NEW TO AIRPLANE SOLUTIONS?

Barcelona (HQ) · Madrid · Boston

Outdated taxes, fees and charges create real costs. When TFCs increase, under-collection directly impacts your margins—while manual monitoring and reconciliation add unnecessary operational costs.

How Air Taxes solves it

Official IATA source, daily updates

Connected directly to the official IATA data source, with daily updates and no manual uploads or spreadsheets.

Automatic alerts for charter and offline pricing

Get notified whenever a tax, fee or charge changes—ideal for charter operations, offline quotations and other pricing workflows outside the PSS.

Back-office validation and QA

Review applicable TFCs for any itinerary with full calculation visibility, helping teams validate results and investigate discrepancies.

Flexible access and integration

Calculate TFCs on demand through our API or receive updated tax data in tailored formats. Already live with Navitaire New Skies through automated file delivery.
